## PROJECTS

Uber Clone (foresight)

- The idea is to use **HTML, CSS, JAVASCRIPT, REACT.Js, NODE.Js, MONGO DB** in order to develop a website inspired by Uber.
- The enhanced part of this website will be to provide drivers for your own car on a rental basis.
- I will also try to find and implement the ways in which I can increase the security of the passengers.

To-Do list

- Used **HTML, CSS, JAVASCRIPT** for creating a site to save users tasks that needs to complete.
- Got familiar with the use of Document Object Model and the local storage.

Flipkart Clone

- Used **HTML, CSS** in the making of a static website inspired by Flipkart UI.
- Learnt how to use media query while making Flipkart Clone a responsive website.
